Model 36 is equipped with a 12" debarking head with carbide teeth and built in depth control. The 20 hp electric motor allows for vigorous performance while it runs at an optimum 1700 RPM for both speed and cost efficiency.

Unique log placement rollers allow for better positioning of the log and eliminate the need to move head

Offloading Arms

Log Rolling Wheels

The hydraulic system features a 16 GPM tandem pump powered by a 15 hp electric motor. Log handling capabilities are extensive with 12 log rolling wheels, 4 unloading arms, 2 log placement rollers to forward or reverse log and 2 hydraulic plugs for (optional) infeed deck.

Foot controlled carriage movement allows hands to be free for hydraulic controls.

OTHER IMPORTANT FEATURES:

- Depth shoes and depth rings to prevent excessive debarking
- Double belt system and dual-sided head engagement for balanced rotation
- All belts accessible for ease of maintenance

OPTIONS:

- 25 hp Kohler V-twin liquid cooled gas engines
- Trailer package
- Plate over hydraulics to accommodate longer logs
- Infeed deck - 12 or 24 ft
- Waste conveyors

SPECIFICATIONS:

Width..... 9.5'
Height..... 8'
Length..... 28'
Weight..... 7000 lbs
Max. Log..... 36" dia x 20' long
Min. Log..... 5" dia x 20' long

Specifications herein are subject to change.
